

## Data sheet

SM 032 (032-1BD70)

## Technical data

| Order no.  | 032-1BD70                             |
|--|---------------------------------------|
| Туре   | SM 032                                |
| Module ID  | 0506 25E0                             |
|  |                                       |
| General information  |                                       |
| Note   | -                                     |
| Features   | 4 outputs 12Bit<br>Voltage -10 V+10 V |
|  | Tonage To Time T                      |
| Current consumption/power loss   |                                       |
| Current consumption from backplane bus   | 60 mA                                 |
| Power loss   | 0.8 W                                 |
| Technical data analog outputs  |                                       |
|  | 4                                     |
| Number of outputs  Cable length, shielded  | 200 m                                 |
|  | DC 24 V                               |
| Rated load voltage   |                                       |
| Reverse polarity protection of rated load voltage  Current consumption from load voltage L+ (without load) | yes<br>-                              |
|  |                                       |
| Voltage output short-circuit protection  | yes                                   |
| Voltage outputs  | yes                                   |
| Min. load resistance (voltage range)   | 5 kOhm                                |
| Max. capacitive load (current range)   | 1 μF                                  |
| Max. inductive load (current range)  | 10 mA                                 |
| Output voltage ranges  | -10 V +10 V<br>0 V +10 V              |
| Operational limit of voltage ranges  | +/-0.3%                               |
| Basic error limit voltage ranges   | +/-0.2%                               |
| Destruction limit against external applied voltage   | max. 24V                              |
| Current outputs  | -                                     |
| Max. in load resistance (current range)  | -                                     |
| Max. inductive load (current range)  | -                                     |
| Typ. open circuit voltage current output   | -                                     |
| Output current ranges  | -                                     |
| Operational limit of current ranges  | -                                     |
| Basic error limit current ranges   | -                                     |
| Destruction limit against external applied voltage   | -                                     |
| Settling time for ohmic load   | 1.5 ms                                |
| Settling time for capacitive load  | 2 ms                                  |
| Settling time for inductive load   |                                       |
| Resolution in bit  | 12                                    |
| Conversion time  | 2 ms all channels                     |
| Substitute value can be applied  | no                                    |
| Output data size   | 8 Byte                                |
|  |                                       |

## Status information, alarms, diagnostics

| Status information, alarms, diagnostics                     |                            |
|---|----------------------------|
| Status display  | yes                        |
| Interrupts  | no                         |
| Process alarm   | no                         |
| Diagnostic interrupt  | no                         |
| Diagnostic functions  | yes                        |
| Diagnostics information read-out                            | possible                   |
| Supply voltage display                                      | green LED                  |
| Group error display   | red LED                    |
| Channel error display                                       | red LED per channel        |
| Isolation   |                            |
| Between channels  | -                          |
| Between channels of groups to                               | -                          |
| Between channels and backplane bus                          | yes                        |
| Between channels and power supply                           | yes                        |
| Max. potential difference between circuits                  | -                          |
| Max. potential difference between inputs (Ucm)              | -                          |
| Max. potential difference between Mana and Mintern (Uiso)   | DC 75 V/ AC 50 V           |
| Max. potential difference between inputs and Mana (Ucm)     | -                          |
| Max. potential difference between inputs and Mintern (Uiso) | -                          |
| Max. potential difference between Mintern and outputs       | -                          |
| Insulation tested with                                      | DC 500 V                   |
| Datasizes   |                            |
| Input bytes   | 0                          |
| Output bytes  | 8                          |
| Parameter bytes   | 10                         |
| Diagnostic bytes  | 20                         |
| Housing   |                            |
| Material  | PPE / PPE GF10             |
| Mounting  | Profile rail 35 mm         |
| Mechanical data   |                            |
| Dimensions (WxHxD)  | 12.9 mm x 109 mm x 76.5 mm |
| Weight  | 60 g                       |
| Environmental conditions                                    |                            |
| Operating temperature                                       | 0 °C to 60 °C              |
| Storage temperature   | -25 °C to 70 °C            |
| Certifications  |                            |
| UL certification  | yes                        |
| KC certification  | yes                        |
|   |                            |
